

Biago Tumino – Digital Product Manager at Checkmyquest

With a background in Physics and a Master's in NANOMAT, Biago Tumino did his PhD in Physics and Chemistry at ENSCP. Right after his PhD, in 2014, he shifted completely from the science trail to open up his own start up in hospitality called *Bnbsitter* which was then sold to their competitor *Checkmyquest*. Biago is now part of the *Checkmyquest* team as Digital Product Manager.

Coralie Teulere – Project Manager R&D at Saint-Gobain

Coralie Teulere did her PhD in Chemistry and Physics of Materials specializing in Polymers at the C3M Laboratory. She then decided, at the end of her PhD, to continue her research in the private sector. She is now occupying the position of Project Manager at Saint-Gobain for construction products.

Fabrice Monti – Microfactory Cofounder

Fabrice Monti is at the head of Microfactory, a startup company specialized in microfluidics that offers their services and their machines to the biggest cosmetic firms. He first pursued his PhD in micro-rheology, and then worked for 10 years at the CNRS, specializing in microfluidics, before finally pivoting to an entrepreneurial profile with training at HEC.

Marie Albéric – CNRS Research Director at LCMCP

Marie Albéric is a CNRS Research Director since November 2018 at the LCMCP. After obtaining her PhD in chemical and structural study of the modern and old elephant's ivory at the LAMS Laboratory (2011-2014), she led her postdoctoral studies at the Max Planck Institute of Colloids and Interfaces (Potsdam, Germany) on biomineralisation mechanisms in sea urchin (2015-2018). She now focuses her research on understanding the mechanisms of pigmentation of the urchin's mineralized tissues.
